- Execution of DPIAs and reporting
- Data Subject Request handling
- Data breach handling (24x7)
- Implement and maintain awareness
- Security measures implementation (ISO 27001)
  - Pseudonymisation
  - Encryption

## Data Protection Officer (DPO) as a Service (DPOaaS)

Could you use some hands-on support with the execution of DPO tasks to meet GDPR requirements? Are you in need of temporary DPO resources to review Data Protection Agreements (DPAs), define and set up Privacy Statements, handle Data Subject Requests in a timely manner, or support or execute and document Data Protection Impact Assessments (DPIAs)? Do you need help with the creation and maintenance of your Records of Processing Activities (RoPA) as a service? Is putting the concept of Data Protection by Design and Default into practise a major challenge for you? Do you need 24x7 support to handle data breaches to ensure an adequate and quick response? Do you need expertise to help you implement security measures (ISO 27001) to ensure the protection of your personal data? Do you have difficulty setting up your Statement of Applicability (ISO 27001)? Or, do you have other concerns related to ISO 27001? Why not try CTG's DPO as a Service solution?

### What is CTG's DPOaaS?

Our DPOaaS can be considered as your first, second, and third-line support desk to fulfill all kinds of requests regarding GDPR and ISO 27001-related issues in a timely manner.

**DPOaaS is always there to help**—If your company is in need of GDPR and/or ISO 27001-related support, a request can be sent to the DPOaaS mailbox. A service coordinator will provide feedback to the requestor and assign the request to a specialist. The specialist will then handle the request.

**Pay for what you need**—A credit-based payment system makes it easy to pay only for services that you need when you need them.

**Knowledge base**—Our compliance experts (GDPR, ISO 27001) will address all challenges that may be encountered during service execution.

**We commit to** successful inspections by supervisory authorities and significant reduction of time, effort, and cost.

**We care**—no-cost remediation of major issues after inspection, within the scope of our work.
